

# 为什么我相信神

**Why I Believe in God** 英文在下面

有些人错误地认为相信神就是迷信，而相信进化论则是科学的。但事实却恰恰相反。我们将使用因果法则来展示这一点。

什么是因果法则？简单地说，因果法则就是任何物质结果都必须有充分的前因。

宇宙的前因是什么？我们的前因是什么？请思考以下逻辑陈述：

1. 某物不可能出于无有；
2. 然而某物现在确实存在着；
3. 所以，某物始终存在着。

1. 某物不可能出于无有：某物不可能出于无有是一个显然正确的事实。物理学家 George Davis 说，“任何物质都无法自我创造”。
2. 然而某物现在确实存在着：我们存在着，我们所生存的宇宙存在着。
3. 所以，某物始终存在着：某物不可能出于无有；然而某物现在确实存在着；所以，某物始终存在着。这是一个无需辩驳的显然结论。但现在的问题是：什么或谁是那始终存在着的？要回答这一点，让我们先看一下我们自己——人类。我们来自哪儿？我们是某些偶然——进化论的产物吗？还是神创造了我们？让我们一起看一下人类某些共同的特质：

- 我们有生命
- 我们有智慧
- 我们有情感

我们有生命

还记得吗，某物不可能出于无有。进化论的教导是：生命出自几百万年前的非生命物质。但我们从未在自然界观测到这一点，也从未在实验室里实现过。所以这一点不是事实，不属于科学。某物不可能出于无有——生命不可能出于非生命。

我们有智慧

再次，某物不可能出于无有，那么我们如何从没有生命和智慧的物质获得智慧？这是绝不可能的。

我们有情感

情感如何能出自非情感的物质？不可能。

另一方面是神。他就是生命，他有智慧和情感。而且他也说过我们是照他的形象造的[，并且他是我们的父亲。

进化论越来越无力，简单说，它不是科学。因此，进化论者已经开始为生命的起源寻找替换答案：也就是“外太空生命”。

这难道不奇怪吗？某些自称靠真理而生的科学家，竟提出了外星人是地球生命起源的非科学理论，却完全拒绝神。

所以，我相信神是因为——这是完全合理的。

## Why I believe in God

Some people incorrectly assume that the belief in God is superstition and the belief in evolution is scientific. The fact is that the opposite is true. We will use the the Law of Causality (Cause and Effect) to show this.

What is the law of causality? "Put simply, the law of causality states that every material effect must have an adequate antecedent cause."

What was the cause of the universe? What is the cause of us? Please consider the following statements of logic:

1. Something cannot come from nothing.
  2. But, something exists now.
  3. Therefore, something has always existed.
- 
1. Something cannot come from nothing: It is true that something cannot come from nothing. This is an obvious fact. The physicist, George Davis stated, "No material thing can create itself."
  2. But, something exists now: We exist. The universe around us exists.
  3. Therefore, something has always existed: Something cannot come from nothing, and something now is in existence, something therefore has always existed. This is an obvious conclusion that needs no debate. But the question now arises, What, or Who is that which has always existed?

In answering that, let us look at ourselves, people. Where did we come from? Are we the result of some accident called evolution, or were we created by God? Let's look at some of the common characteristics of people:

- We are alive
- We are intelligent
- We are emotional

We are ALIVE

Remember that something cannot come from nothing. Evolution teaches that life somehow came from some kind of non-living matter millions of years ago. This is something that has never been observed in nature or produced in a laboratory. It is therefore not a fact and does not belong in a science text book. Something cannot come from nothing. Life cannot come from the non-living.

We are INTELLIGENT

Again, something cannot come from nothing. How do we get intelligence from something without life and intelligence? It simply does not happen.

We are EMOTIONAL

How does emotion come from something without emotion? It cannot.

On the other hand, there is God. He is alive, He is intelligent and He is emotional. Furthermore He says that we are made in His image [Genesis 1:27] and that He is our Father.

The theory of evolution is looking weaker every year. Put simply, it is not scientific. As a result, evolutionists have begun looking for alternate answers for the origin of life: namely extraterrestrial life.

Isn't it strange that some scientists – people who claim to live by facts – suggest something as unscientific as aliens originated life on earth, but they totally reject the idea of God.

So, I believe in God because it is totally reasonable.
